

Company Profile

Univa is the leading innovator in the burgeoning market of workload management solutions - software products that optimize performance of big data and business-critical applications, services and containers. With Univa, enterprises can better utilize and scale compute resources across their on-premise, cloud, and hybrid infrastructures, delivering significant economic benefits and efficiencies. Deployed on the largest clusters in the world, Univa solutions manage thousands of applications and run billions of tasks every day. Univa's leadership and talent, and dedicated partner ecosystem, enables continuous delivery of best-in-class, enterprise-grade solutions globally. The company is headquartered in Chicago, with offices in Canada and Germany.

Product Lines

The **Univa Grid Engine** suite is the leading workload management system. The solution maximizes the use of shared resources in a data center and applies advanced management policy enforcement to deliver results faster, more efficiently, and with lower overall costs. The product suite can be deployed in any technology environment, including containers: on-premise, hybrid or in the cloud.

Navops is a suite of products that enables enterprises to take full advantage of Kubernetes and provides the ability to quickly and efficiently run containers at scale. Navops utilizes workload placement and advanced policy management across on-premise, cloud, and hybrid infrastructures. With Navops, companies can automate microservices applications and efficiently respond to end user demand.

Financial Profile

Privately Held, Founded in 2011

Executive Team

Gary Tyreman	President & CEO
Azam Foda	CFO
Fritz Ferstl	CTO
Robert Secontine	VP Sales
