Univa is the leading independent provider of software-defined computing infrastructure and workload orchestration solutions. Univa’s intelligent cluster management software increases efficiency while accelerating enterprise migration to hybrid clouds. Millions of compute cores are currently managed by Univa products in industries such as life sciences, manufacturing, oil and gas, transportation and financial services. We help hundreds of companies to manage thousands of applications and run billions of tasks every day. Univa is headquartered in Chicago, with offices in Toronto and Munich.

The **Univa Grid Engine** suite allows organizations to create a single compute pool across distributed data center resources. With Grid Engine, enterprises can more efficiently execute complex and mission-critical applications, manage workloads automatically, and scale across on-premise, cloud or hybrid infrastructures. Grid Engine allows customers to address specific business needs, including comprehensive monitoring, reporting; cloud resource management and integration; license sharing according to business objectives; and container orchestration.

**Navops** is a suite of products that enable enterprises to easily migrate to the cloud or hybrid cloud, increase efficiencies and run containers at scale. Navops utilizes workload placement and advanced policy management across on-premise, cloud, and hybrid infrastructures. With Navops, companies can automate microservices applications and efficiently respond to end user demand.

Privately Held, Founded in 2011

### Executive Team
- Ross Sonnabend, COO
- Azam Foda, CFO
- Fritz Ferstl, CTO
- Robert Secontine, VP Sales
- Robert Lalonde, Vice President and General Manager, Cloud
- Bill Bryce, VP of Products
