

Features

- Click 'n Go - Submit workload to Grid Engine within as few as 10 minutes
- Full Automation
- Configurable number of compute nodes
- Intel Cluster Ready support

End users can reliably run workload within as few as 10 minutes.

One Click HPC Cloud, Managed by RightScale

For many organizations the high capital costs, lack of data center space and the specialized knowledge of deploying and managing high performance compute clusters eliminates the possibility of adoption.

A Leap Forward

Univa and RightScale bring improved ease of use and simplicity to HPC in the Cloud. Never before has extending Grid Engine to the cloud been easier or more affordable. Only one solution offers the flexibility of preserved workflow integration, choice of configurations and the simplicity of one click HPC.

Now Anyone Can Use HPC in the Cloud. No IT Required

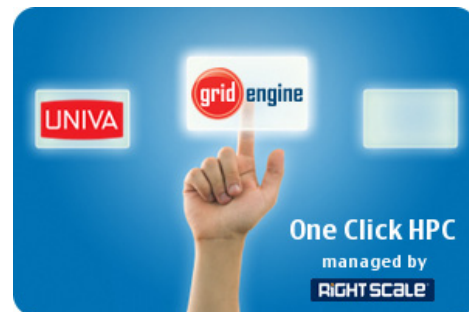

The RightScale cloud management platform enables organizations to easily deploy and manage cloud servers. The integration with UniCloud extends the RightScale platform by automating an Intel Cluster Ready standardized Grid Engine cluster configuration with the simplicity of a ServerTemplate. With the "push of a button" a fully functioning Amazon EC2 hosted Grid Engine cluster can be brought online within minutes.

End users can reliably run workload within as few as 10 minutes.

Integrated Grid Engine Workflow

By enabling the integration of existing workflow into HPC cloud resources, Univa extends the reach of cloud to the largest HPC user community - Grid Engine - with over 10,000 installations and with proven industry use and ISV support for any application including scientific, engineering, data analysis, life sciences, insurance or media processing.

Now, on-demand access to cloud cluster computing resources without the upfront investment is possible. Whether your organization is just beginning to use HPC, wants to expand its application or are seeking to add on-demand capacity to in-house systems, this solution is for you.

About Univa

Univa, the Data Center Optimization Company, is the leading provider of optimization and management software for traditional, dynamic and cloud data centers. Our award-winning products are used by Global 2500 companies to improve resource sharing, amplify the efficiency of people and processes, and increase application and license utilization. Univa offers the industry's broadest, most innovative and integrated product set for managing shared, high-demand data center resources. From workload management to policy-driven provisioning across physical, virtual and cloud resources, only Univa provides a proven combination of enterprise-class capabilities, industry expertise, and community sponsorship. Univa is headquartered in Lisle, Illinois offices worldwide. For more information, go to www.univa.com
